DOS EQUINE TO DISTRIBUTE ECO-FRIENDLY MULTI-USE BAGS

APRIL 2009 - Dos Equine LLC is pleased to announce that they have been appointed an Agent for the eco-friendly TuckerBag. "We are very excited about this opportunity to distribute eco-friendly shopping bags to the equestrian community" said Jan Grimm, owner of Dos Equine. With the problems and environmental cost of plastic shopping bags continuing to become more wide-spread, TuckerBags are answering the call in providing a strong yet fashionable lifestyle and shopping bag alternative.

TuckerBags are reusable shopping bags that were designed for the environmentally conscious person who wants to show their love of horses and/or dogs, coming in an equestrian design as well as a paw-prints design. The TuckerBag is made of 100% rip-stop polyester, is machine washable and holds in excess of 35 lbs. "What I like most about this bag is it's size - each one folds out to 19" x 16" in size which is about double the size of a normal plastic grocery bag" said Ms. Grimm. Each bag also comes with it's own 4" attached pocket to fold back into when not in use. The bags are great for trips to the tack store, grocery store or to the barn!

Customization is available by adding a logo or business name to the outside pocket. In addition, logos can be further complemented by designing your own bag pattern - great advertising for tack stores and mobile units!
