

The Whip Clip™ is a unique, new innovative product that helps riders communicate with their horse when needed without the inconvenience of constantly carrying a whip. Whether you are a trainer, student or pleasure rider – you'll find The Whip Clip™ a convenient, useful tool. All you need is to wear tall boots or half chaps and carry a whip. More information is available at [www.thewhipclip.com](http://www.thewhipclip.com).

## **Instructions:**

**Instructions for inserting The Whip Clip may differ depending on the type of whip used (i.e. dressage whip vs. jumping bat). However, when retrieving the whip from the holder, simply push the whip away from you. By experimenting with your particular whip, you will find what works best for you!**

### **Inserting**

1. Slide the Whip Clip over desired (left or right) boot or half chap so that the openings are outside of the boot.
2. Insert the narrow portion of whip shaft into the lower whip clip chamber/opening
3. Pull whip toward you until the upper portion of whip shaft is in the upper whip chamber/opening –or- snap upper portion into upper opening (depending on the whip type used)
4. Gently slide or tap the whip downward into the holder until it feels snug

### **Withdrawing**

1. Push the whip outwards you (*do not pull upwards*), until it clears both openings (and snaps out)
